PROFESSIONAL SUMMARY

Computer Science student focusing on backend development and secure system design. I have experience building REST APIs, authentication systems, and database-driven apps using Django and Flask.

I am interested in creating systems that can grow and are easy to manage. I focus on clean architecture, efficient data handling, and secure application design.

EDUCATION

B.Tech in Computer Science & Engineering (Cybersecurity)

Indian Institute of Information Technology, Kottayam

2025 – Present |

B.Sc in Computer Science (Cybersecurity)

Delhi University (Former)

2025 (Transferred after foundation year)

Schooling (CBSE):

Class 12th: 82% | Class 10th: 92.2% |

Selected into JNV on national merit but discontinued by choice.

TECHNICAL EXPERTISE

Programming & Databases: Python, C, C++, Bash, JavaScript, SQL, PostgreSQL, MongoDB

Cybersecurity: Ethical Hacking, Network Security, Vulnerability Assessment, WiFi Security, Linux Hardening, IDS/IPS (Snort, Suricata)

Networking & DevOps: WireGuard, Docker, Nginx, Reverse Proxy, SSL Automation (Cloudflare)

Web Development: Django, Flask, REST APIs, HTML, CSS, JavaScript

AI & ML: Deepfake Detection, CNN Models, Dataset Pipelines

RELEVANT PROJECTS

1. Safenex – Cloud-Based Firewall + Admin Dashboard

Developed a multi-device monitoring and security system with centralized backend control and real-time activity tracking.

- Designed role-based access system for multi-user environments
- Integrated logging and alert mechanisms for monitoring activity
- Built backend architecture using Django and PostgreSQL

3. Deepfake Detection AI

- Developed a machine learning model to classify real vs. manipulated media.
- Trained CNN models using structured datasets
- Built Flask-based APIs for model inference
- Automated preprocessing pipeline for efficient data handling

4. Surveillance DVR Security Analysis

Performed security analysis on DVR systems to identify vulnerabilities and misconfigurations.

- Documented attack surfaces and security gaps
- Suggested mitigation strategies and secure configuration practices

5. Personal Portfolio Website

Developed a responsive portfolio website to showcase projects and technical skills.

- Built using HTML, CSS, JavaScript and deployed via GitHub Pages
-

CERTIFICATIONS & TRAINING

- UNICEF YuWaah – MS Office Certification
 - Introduction to Cybersecurity – EdX
 - Careers in Cybersecurity– Cybrary
 - Ethical Hacking and Cybersecurity - World Technocon
 - OSINT – Cybrary
 - DEF CON Srinagar 0x0 - United Latino Students Association
-

ACHIEVEMENTS & RECOGNITION

- Recognized on LinkedIn for cybersecurity projects and technical content
- Selected into Jawahar Navodaya Vidyalaya on national merit
- Contributed to open-source and technical projects

LEADERSHIP & RESPONSIBILITY

- School Captain and House Captain
- Led development of Safenex project
- Organized and coordinated technical and school-level events

RESEARCH INTERESTS

- AI for Cybersecurity
- Secure Cloud Architecture
- System Security and Vulnerability Analysis
- Deepfake Detection Systems

INTERESTS

Cybersecurity research, open-source contribution, mentoring, gaming, photography
